*Petition to the House of Commons in Parliament assembled, WHEREAS*  
Canadians are concerned by The Honourable Kim Pate and Leah Gazan

### **Federal Bill S-233 and Federal Bill C-223**

#### **An Act to develop a national framework for a guaranteed livable basic income**

As written, this bill is alarmingly vague and threatens potentially serious infringement of Canadian's Constitutional rights to freedom and security. In that, "... a guaranteed livable basic income would go a long way toward eradicating... health conditions and educational outcomes"... "while facilitating the transition to an economy that responds to the climate crisis and other current major challenges", suggests that the receiving of this income would be dependant on conditions such as mandatory vaccination or other compliance measures similar to a Chinese style social credit score system – which is unconstitutional in Canada. Also, there is no mention if taxpayers Pensions will be reduced or ended.

Of further concern, does this bill imply that foreign stakeholders and political decision makers who are members that are representatives of the outside organization actively pushing a foreign agenda known as the World Economic Forum can also develop the framework to suit their interests in a digital currency attached to a digital identification and health score as well by stating, "...other relevant stakeholders including policy developers and political decision-makers...", are allowed to be consulted in developing the framework. Also that the framework must include measures "...to create national standards for health and social supports that complement a guaranteed basic income program..." suggests the Bill – when passed – will be fluid and additional requirements may be added as the framework is developed. This is disturbing as the Great Reset by Klaus Schwab boasts of punishment of those individuals who do not comply with the dictates through restricting this income.

The Canadian Constitution sets out numerous rights and protections for all Canadians. Any mandatory vaccination, restriction in speech or in mobility is an infringement of Canadian's Constitutional Rights. Bodily autonomy, the right to refuse medical procedures, freedom of speech and expression and the freedom of mobility, as well as security, safety and equality, are Constitutional rights to Canadians. This bill is allegedly written to ensure guaranteed access to a livable basic income, however, we do not see those ends clearly reflected in this bill, instead further infringement of rights.

In the past 2 years government has over-stepped their authority on Canadians with the mandatory masking, vaccination and vaxpassports. Canadians are not "racist, anti-vaxxers" - Canadians are outraged and have suffered greatly due to this government overreach, like the failure of ending mandates. It is the governments duty to clarify bills and consider the Canadian Constitution so as not to further alienate citizens of Canada. Outright violations of Canadian laws and values continues, in that, any official who is involved with foreign organizations are in direct conflict of interest and breach of trust. It is understandable that Canadians are questioning the integrity of government.

*We, the undersigned citizens and residents of Canada call upon the House of Commons and the Senate to: exhibit decorum and correct this Bill by adding a clause to ensure this bill will not be used to infringe upon the Constitution of Canada and the Bill of Rights of Canadians.*

*Dated this \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_.*
